Lab 08: String Reversal in 8086 Assembly

January 2, 2024

Objective

Become familiar with string manipulation in 8086 assembly language.

Lab Work

Write an 8086 assembly program that reverses a given string and outputs the reversed string.

Hints

- You can use DOS interrupts (`INT 21h`) for string input and output.

- Remember to use registers and the stack for string manipulation.
